

Year 5 Power Up for the Eleven Plus 2021-2022

The best chance of 11+ success

The Secondary Transfer tests (known more commonly as the Eleven Plus) assess maths, English, verbal and non-verbal reasoning skills.

With ever-growing competition for grammar school places, children need to be working at a high level to achieve a qualifying score in these demanding tests.

At Flying Start, we understand how stressful the Eleven Plus (11+) process can be - both for children and parents. Our unique, holistic approach to tuition helps to minimise stress and optimise success! Since 2009, we have successfully guided hundreds of families through their 11+ journey and we are proud of the awards we've won for our innovative approach.

Course content

Tailored to the **GL Assessment** tests, our popular Year Five **Power Up for the Eleven Plus** course covers the four key areas of English, maths, verbal and non-verbal reasoning. The course has been developed by Flying Start's founder, Sian Goodspeed: experienced primary school teacher, acknowledged expert in the 11+ field and author of many Schofield and Sims 11+ books.

The GL Assessment 11+ test covers a broad range of potential

question types and, whilst much of the maths and English content should be taught at school, specific question types, exam strategies and speed-working techniques are not.

Verbal and non-verbal reasoning are also not usually covered in school, although they can account for up to 50% of the 11+ test. Our essential techniques give students the confidence to adapt and apply knowledge efficiently, no matter what format or question types they encounter.

Give your child 11+ Superpowers™!

Children flourish and learn best when happy, engaged and confident within a positive, nurturing environment and providing these optimal learning conditions is a top priority at Flying Start.

In addition to the core curriculum content and exam strategies, we provide our students with a unique toolkit of **11+ Superpowers™**. This toolkit includes a range of techniques from neuro-linguistic programming (NLP) that will enable your child to effectively deal with anxiety, improve concentration and enhance their performance. As well as giving our students an important edge in exam situations, these tools are valuable and highly effective additions to a child's skill set and beneficial way beyond the 11+ point.

We believe that motivation should come from within and we foster in our students a growth mindset, encouraging them to take responsibility for their learning, set personal goals and understand their own progress. In this way, they take ownership of their learning and are far more likely to succeed.

Who is the course for?

The course is suitable for students in Year 5 preparing for the GL Assessment 11+ tests as it is tailored to the question types and formats commonly found on these tests. Please note that the exact question types and content of 11+ tests will vary from county to county so please do contact us if you are unsure whether or not this course is suitable for your child's particular exam preparation and we will be happy to advise.

Students should already be working at a reasonable level in maths and English to cope with the pace required for this course. If you feel your child is struggling in any area, they may benefit from extra support in the form of additional 11+ Flash Workshops, available throughout the year and bookable as and when required.

Course structure

The course runs during term time and comprises 37 weekly, two-hour, small-group lessons taught by experienced, highly qualified tutors. Groups of five or more students are supported by a teaching assistant giving a staff:pupil ratio of 1:5. Lessons take place either online or at one of our tuition centres and are designed to be interactive and fun. All resources needed for the course are included in the fees. Should your child require any additional help, we will advise you how best to support them with appropriate resources.

Optional courses and mock tests run throughout the spring and summer breaks. We recommend that pupils attending our **Year 5 Power Up for the 11+ course** also attend a **Revision and Practice** course and a series of **mock tests** over the summer in order to gain maximum benefits from the tuition.

Course benefits

Students completing this course will:

- Learn effective strategies for tackling the main 11+ question types.
- Acquire a powerful toolkit of lifelong learning techniques.
- Become confident in exam situations.
- Develop reasoning and independent thinking skills.
- Accelerate their school progress.
- Have fun!

Year 5 11+ booking process

Step 1: Visit our website

www.flyingstarttuition.co.uk/11-plus-courses/year-5-11-plus-course/

Step 2: Choose the course you'd like to book.

Step 3: Pay your deposit to hold your child's place.

Step 4: One of our friendly team will be in touch to complete your child's registration process.

Please note: Once the deposit has been made, payment of the remaining fees should either be paid in full or by monthly instalments. Monthly instalments are usually paid by direct debit and we require all our customers to set up a direct debit before confirming a tuition place. If starting partway through a course, lessons are booked from the pupil's start date to the end of the academic year and fees and monthly instalments will be calculated on a pro-rata basis.

If you wish to pay with Tax-Free Childcare (TFC) or Childcare Vouchers (CV), you may do so if the course is running at one of our Ofsted registered centres. We are unable to accept TFC or CCV payments for courses running online. Please note that we cannot accept TFC or CCV for payment of deposits and we will take direct debit payments for the monthly instalments until the TFC or CV payments are in place.
